

Checklist for your doctor's appointment

If you are applying for child care benefit and you have a disorder that is not chronic, we will need documentation of this from your doctor. In this context, “disorder that is not chronic” means a health disorder that has not lasted more than two years or is not expected to last more than two years.

The documentation must state clearly:

- why you cannot be in occupational activity
- when your illness started
- when your doctor expects you to have recovered
